

Certificate of Appreciation

To whom it may concern,

We would like to recognize the outstanding contribution, effort, and dedication of Wissam Gaith to our team as a volunteer research assistant for the CoronaNet Research Project. Wissam Gaith has been active with our project since 2021-03-29 and, in that time, coded and updated policy information for Central African Republic, Chad, United Arab Emirates. Without the support of our dedicated RAs, such as Wissam Gaith, we would not be able to sustain our pace of policy documentation which, to date, counts over 70 thousand policies from virtually every country in the world.

The CoronaNet Research Project is working to gather comprehensive and global data on government responses to the COVID-19 crisis. This work includes gathering information about which governments are responding to the coronavirus, toward whom policies are targeted (e.g. other countries), the types of policies enacted (e.g. travel restrictions, banning exports of masks) and their timing and duration. For more information, see www.coronanet-project.org.

Wissam Gaith has been a country expert for Central African Republic, Chad, United Arab Emirates. This role involves researching and creating a comprehensive overview of government policies enacted in Central African Republic, Chad, United Arab Emirates as well as collecting and entering new and updated policy information related to COVID-19. Becoming a country expert requires passing a series of trainings on how to code data in the CoronaNet database, which uses a custom Qualtrics survey instrument, keeping up with policy coding on a weekly basis, and attending weekly country- or regional coordination meetings as well as project-wide meetings.

In addition to being a country expert, Wissam Gaith took on the following additional roles within CoronaNet:

- Internship: Wissam Gaith has joined and successfully finished an internship program as part of their work for CoronaNet. Through an internship, Research Assistants get an insight into, and contribute to, special projects and managerial aspects of CoronaNet. Interns are expected to participate consistently in CoronaNet activities and show initiative in taking on new tasks and projects.

In conclusion, we would like to reiterate our thanks to Wissam Gaith for supporting these important and time-sensitive collection efforts and for being part of the CoronaNet community.
