

## Certificate of Appreciation

To whom it may concern,

We would like to recognize the outstanding contribution, effort, and dedication of Nadja Katharina Meichle to our team as a volunteer research assistant for the CoronaNet Research Project. Nadja Katharina Meichle has been active with our project since 2020-01-06 and, in that time, coded and updated policy information for Norway, Switzerland. Without the support of our dedicated RAs, such as Nadja Katharina Meichle, we would not be able to sustain our pace of policy documentation which, to date, counts over 70 thousand policies from virtually every country in the world.

The CoronaNet Research Project is working to gather comprehensive and global data on government responses to the COVID-19 crisis. This work includes gathering information about which governments are responding to the coronavirus, toward whom policies are targeted (e.g. other countries), the types of policies enacted (e.g. travel restrictions, banning exports of masks) and their timing and duration. For more information, see [www.coronanet-project.org](http://www.coronanet-project.org).

Nadja Katharina Meichle has been a country expert for Norway, Switzerland. This role involves researching and creating a comprehensive overview of government policies enacted in Norway, Switzerland as well as collecting and entering new and updated policy information related to COVID-19. Becoming a country expert requires passing a series of trainings on how to code data in the CoronaNet database, which uses a custom Qualtrics survey instrument, keeping up with policy coding on a weekly basis, and attending weekly country- or regional coordination meetings as well as project-wide meetings.

In addition to being a country expert, Nadja Katharina Meichle took on the following additional roles within CoronaNet:

- **Internship:** Nadja Katharina Meichle has joined and successfully finished an internship program as part of their work for CoronaNet. Through an internship, Research Assistants get an insight into, and contribute to, special projects and managerial aspects of CoronaNet. Interns are expected to participate consistently in CoronaNet activities and show initiative in taking on new tasks and projects.
- **Regional Manager:** This role involves leading a group of RAs. It involves oversight and support of RAs, including conducting regular performance and activity appraisals to guarantee the development of a consistent and up-to-date dataset. Regional Managers are the first point of contact for RA questions regarding research and organizational issues. The role requires a profound knowledge of the construction of the dataset and strong leadership and management skills in order to foster a team spirit among the RAs, enhance their motivation, and develop a positive work environment.
- **Senior Research Assistant Manager:** This role involves leading a group of RAs. It involves oversight and support of RAs, including conducting regular performance and activity appraisals to guarantee the development of a consistent and up-to-date dataset. Senior Research Assistant Managers are the first point of contact for RA questions regarding research and organizational issues. The role requires a profound knowledge of the construction of the dataset and strong leadership and management skills in order to foster a team spirit among the RAs, enhance their motivation, and

06/30/2021

develop a positive work environment.

- **Working Paper Series Managing Editor:** Spearheaded the CoronaNet Workshop Paper Series, a program designed to facilitate RA and student research, and takes an active role in its management. This role includes arranging internal writing and research seminars, reviewing and evaluating research proposals, and assisting Principal Investigators in supervising RA and student research as well as planning for future student research dissemination strategies. Requires solid knowledge of the fundamentals of research design and an ability to provide clear guidance to RAs for improving their research.
- **Research Article:** Nadja Katharina Meichle has written a research article that has been published in the CoronaNet Working Paper Series. This project included developing and executing a research plan, engaging in original data analysis, and writing in clear and concise language accessible for policy makers and the public. Nadja Katharina Meichle went through an intensive training and has proven excellent scholarly research expertise. The article can be found online via [www.coronanet-project.org](http://www.coronanet-project.org)

In conclusion, we would like to reiterate our thanks to Nadja Katharina Meichle for supporting these important and time-sensitive collection efforts and for being part of the CoronaNet community.
