

Certificate of Appreciation

To whom it may concern,

We would like to recognize the outstanding contribution, effort, and dedication of Saif Khan to our team as a volunteer Advanced research assistant for the CoronaNet Research Project. Saif Khan has been active with our project since 2020-04-04 and, in that time, coded and updated policy information for Cuba, Estonia, Indonesia, Jamaica, Myanmar, Papua New Guinea, Paraguay, Peru, Seychelles, Solomon Islands, Tanzania, United Kingdom, United States. Without the support of our dedicated RAs, such as Saif Khan, we would not be able to sustain our pace of policy documentation which, to date, counts over 70 thousand policies from virtually every country in the world.

The CoronaNet Research Project is working to gather comprehensive and global data on government responses to the COVID-19 crisis. This work includes gathering information about which governments are responding to the coronavirus, toward whom policies are targeted (e.g. other countries), the types of policies enacted (e.g. travel restrictions, banning exports of masks) and their timing and duration. For more information, see www.coronanet-project.org.

Saif Khan has been a country expert for Cuba, Estonia, Indonesia, Jamaica, Myanmar, Papua New Guinea, Paraguay, Peru, Seychelles, Solomon Islands, Tanzania, United Kingdom, United States. This role involves researching and creating a comprehensive overview of government policies enacted in Cuba, Estonia, Indonesia, Jamaica, Myanmar, Papua New Guinea, Paraguay, Peru, Seychelles, Solomon Islands, Tanzania, United Kingdom, United States as well as collecting and entering new and updated policy information related to COVID-19. Becoming a country expert requires passing a series of trainings on how to code data in the CoronaNet database, which uses a custom Qualtrics survey instrument, keeping up with policy coding on a weekly basis, and attending weekly country- or regional coordination meetings as well as project-wide meetings.

After gaining sufficient experience and expertise within CoronaNet, RAs are promoted to Advanced Research Assistant, which is the position currently held by Saif Khan. This role involves coding an impressive number of 100 policies or more and being engaged as a research assistant for at least 3 months. Advanced research assistants have gained high expertise in PHSM data and the CoronaNet dataset. They have extensive knowledge of the taxonomy and the project structure, and provide support to other research assistants. With their considerable knowledge, they play an integral role in the success of the project.

In addition to being a country expert, Saif Khan took on the following additional roles within CoronaNet:

- **Data cleaning:** This role requires Saif Khan to identify errors in the policy entries and clean them through updates in the Qualtrics survey. This role involves high attention to detail and an ability to perform repetitive tasks over a long period with high accuracy.
- **Project Study:** Saif Khan has participated in a practical experience 'Project Study' module at the Hochschule für Politik at the Technical University of Munich. Through this module, students receive 18 ECTS for 500 hours of practical employment with CoronaNet. Project Study students are incorporated into every aspect of the project—such as coding, validation, cleaning, and

06/30/2021

managing of data—and also gain significant management experience through leading other RAs as country/regional managers or through managing special projects.

- **Project Manager:** Saif Khan is an integral part of senior management team responsible for the selection, training, allocation, and monitoring of RAs. The Project Management team monitors and anticipates vacancies among RAs and country/regional managements and actively work to fill them to ensure staffing consistency. This role also provides support to country and regional managers in addressing performance and other issues that emerge within their teams. This role requires exceptional management and human-relations skills as well a strategic and problem-solving outlook to ensure smooth operation of CoronaNet.

In conclusion, we would like to reiterate our thanks to Saif Khan for supporting these important and time-sensitive collection efforts and for being part of the CoronaNet community.
